

WESTMINSTER THERMALLY MODIFIED WOOD

INTRODUCING

ETERNAL THERMAL

BY WESTMINSTER

STRONG + RESILIENT TIMBER

Westminster's Thermally Modified Wood's distinctive characteristics make it the superior alternative to hardwood and other and competing modified products. Westminster starts with fine grain, high end fibre, and finally preserves this product with only the finest European machinery. In our long history of preserving wood the best timber in is the best timber out. The thermal treatment increases the wood's biological durability and integrity.

ECOLOGICAL + PROCESS

Westminster's Thermally Modified Architectural also meets the requirements of today's consciousness and budget. The scientific process of HEAT, STEAM, and PRESSURE gives LIFE to wonderful wood we all can enjoy.

CHEMICAL FREE

SCANDINAVIAN PROCESS
